The table shown above is all about the issues related to datasets. Here is some of the recommendation for improving the datasets.

- Providing gender consistency.
- Add extra column with age of customers.
- Take care about blanks.
- Add transaction months in datasets.
- Store numbered data as numbers
- Use proper date format

This is all about datasets and it was great experience with your datasets.  
Please let me know if you have any issue related to datasets.
